

车底炉 Bogie hearth Furnace

功能叙述	车底结构用于加热大型工件
加热方式	<ul style="list-style-type: none"> • 电加热 (热风循环) • 燃气加热
优点	<ul style="list-style-type: none"> • 均温度优良 ($\pm 5^{\circ}\text{C}$) • 可选择不同的炉底移动方式 • 在加热室能自动控温 • 特殊保温节省能源消耗
使用于	<ul style="list-style-type: none"> • 大型工件的热处理

型号	尺寸(mm) (W×L×H)	温度范围 ($^{\circ}\text{C}$)
BHF-C	依照需求客制 化尺寸	100~500

车底炉 Bogie hearth Furnace

Description	Bogie furnace is make up of a main structure base for heating very large parts
Heating Method	<ul style="list-style-type: none"> • Electric Heating (convection) • Gas Heating
Advantage	<ul style="list-style-type: none"> • Temperature Uniformity ($\pm 5^{\circ}\text{C}$) • The bogie moves into the furnace by various option • Automatic temperature control • Energy efficient design insulation
Application	<ul style="list-style-type: none"> • Large parts' heat treatment

Type	Dimension(mm) (W×L×H)	Temperature Range (°C)
BHF-C	Customized upon request	100~500
