

# 壓光滾筒

## Calender Roller (2)

### 【規格參數】 Specification

尺寸/Dimension	Φ300~1500mm x L 900~4000mm
溫度/Temperature	Max 250°C
線速度/Linear speed	10~100m/min
線壓力/Linear pressure	max 200kN/m
表面處理/Surface Treatment	鍍硬鉻，鏡面/超鏡面 Hard-chrome plating, mirror/polished finish

### 【產品描述】 Product Description

在泡沫塑料、紙尿布、汽車內飾材料等近年來應用快速發展的不織布加工方面，電磁加熱滾筒以其優異的性能發揮越來越重要的作用。同時電磁感應加熱滾筒在各類不織布、紙張、橡膠等複合的材料壓光工藝中也有相當廣泛的應用。

In foam, diapers, auto interior materials such as rapid development in recent years, the application of weaving hot working, induction heating roller with its superior performance plays a more and more important role. At the same time, the induction heating roller in all kinds of non-woven fabric, paper, rubber and other material in composite, calender process, also has been widely used.

### 【應用領域】 Main Applications

不織布紙尿褲	Non-woven fabrics in diapers
不織布汽車座椅	Non-woven fabrics in car seats
紡織品	Textile
不織布產品	Non-woven fabrics for other applications
硫化橡膠	rubber vulcanization
