

# 壓延滾筒

## Calender Roller (1)

### 【規格參數】 Specification

尺寸/Dimension	Φ320~600mmxL960~2200mm
溫度/Temperature	100~220°C
線速度/Linear Speed	10~100m/min
線壓力/Linear Pressure	max 400kN/m
表面處理/Surface Treatment	鍍硬鉻、鏡面/非鏡面 Hard-chrome plating,mirror/polished finish

### 【產品描述】 Product Description

在塑料、橡膠製品生產過程中大多數的材料的壓延溫度在160~220°C之間。採用電磁感應加熱壓延滾筒對PVC片材、金屬片材等加熱加工，不但可獲得均一的強度，而且能創造出多種質感。

In the production of plastics and rubber products,160~220°C is the most popular calendering temperature.The induction heating calender roller is employed in the thermal processing of PVC sheet and metal sheet.Uniform strength will be achieved as well as various textures.

### 【應用領域】 Main Applications

PVC片材壓延  
金屬材料壓延

Calendering of PVC sheet  
Calendering of metal sheet
